CARVED ONYX

Onyx is a soft, porous stone deposited around hot springs and in caves. Large deposits of Onyx in Southern Mexico are mined by the local villagers and carved into many interesting figurines and decorative shapes. Natural colors include: clear, white, green, beige, brown, pink, gray, and banded combinations. Onyx can be easily dyed and the bright colors such as pink, blue, purple, yellow, etc. have been added to resemble fruit or enhance the colors of charms and pendants.
