

<p><b>Fuchsite</b></p> <p>Green Mica is called Fuchsite or sometimes Chrome Mica. The green color comes from small amounts of Chromium present in the stone. Fuchsite may have crystals of Ruby or Kyanite that are large enough to see, the Ruby is often Fluorescent. Fuchsite can be polished into various kinds of ornamental objects such as spheres, vases, or statues.</p> <p><b>Origin: Brazil</b></p>	<p><b>Fuchsite</b></p> <p>Green Mica is called Fuchsite or sometimes Chrome Mica.
